INDEX TO VOL. III.

ALGEBRA.

PAGE

Exposition of a general theory of linear transformations. By *George Boole*. Parts I. and II. 1, 106
On the surd roots of equations. By *R. Moon* 20
Note on a solution of a cubic equation. By *J. Cockle* 28
A suggestion in notation 48
Remarks on the binonial theorem 61
Note on a class of factorials. By *D. F. Gregory* 89
On the general problem of intercalations 98
Note on the theory of the solutions of cubic and biquadratic equations. By *J. Cockle* 104
A method of obtaining any root of a number in the form of a continued fraction 120
Expression for the discontinuous law of the sliding scale in the corn-law 152
On a difficulty in the theory of algebra. By *D. F. Gregory* 153
On Elimination. By *R. Moon* 183
Note on a proposition in the theory of numbers 247

GEOMETRY.

Solution of the problem "to find the envelop of a chord of a conic section which subtends a constant angle at the focus." By *J. Booth* .. 87
Demonstrations of some geometrical theorems analogous to that of Cotes 144
On a new property of the ellipse and hyperbola 196
Solution of the problem "to find the envelop of a plane, such that the sum of the squares of the perpendiculars on it from *n* given points is constant" 198
On the intersection of curves. By *Arthur Cayley* 211
On the geometrical relations due to the rotation of a solid body. By *Arthur Cayley* 224
Solution of the problem "to find the equation to a straight line which rests on four given straight lines" 231
On the relations between the direction cosines of a line referred to two systems of rectangular co-ordinates 248

TRIGONOMETRY.

Demonstration of Napier's analogies 96
On certain expansions in series of multiple sines and cosines. By *Arthur Cayley* 162
Mnemonic rule in spherical trigonometry 291

DIFFERENTIAL AND INTEGRAL CALCULUS.

On the integration of certain differential equations. By *B. Bronwin* 29, 175
On the properties of a certain symbolical expression. By *Arthur Cayley* 62
On the limits of Maclaurin's theorem. By *A. Q. G. Craufurd* 84
Addition to the preceding article 159
Remarks on the distinction between algebraical and functional equations. By *R. L. Ellis* 92

Mathematics
General
Chem.-Math.
8471.

PAGE

On elliptic functions. By *B. Bronwin* 123
Note on the preceding article 197
On the solution of functional differential equations. By *R. L. Ellis* 131
On certain definite integrals. By *Arthur Cayley* 138
On some definite integrals 168
Evaluation of certain definite integrals. By *R. L. Ellis* 185
On the transformation of definite integrals. By *G. Boole* 216
On certain cases of geometrical maxima and minima 237
On the solution of certain functional equations. By *D. F. Gregory* 239
On the integration of certain equations in finite differences. By *B. Bronwin* 258
On a class of differential equations, and on the lines of curvature in an ellipsoid. By *A. Cayley* 264
On partial differential equations. By *W. Walton* ....
Remarks on a theorem of M. Catalan. By *G. Boole* 277
On Lagrange's theorem. By *A. Cayley* 283
On Fourier's theorem 288

MECHANICS.

On the motion of a sphere in a cylinder which revolves uniformly in a vertical plane. By *J. Booth* 42
On the motion of a particle along variable and moveable tubes and surfaces. By *W. Walton* 49
On the motion of a solid body about its centre of gravity 148
Demonstration of the principle of virtual velocities 150
Propositions in the theory of attraction. Parts I. and II. 189, 201
Researches in rotatory motion. By *A. Bell* 213
Note on vibrating cords 257
Note on a problem in dynamics 267

ASTRONOMY.

On the relation between the long inequalities of two mutually disturbing planets 95
On certain formulæ made use of in physical astronomy 249
On the stability of the eccentricities and inclinations of the planetary orbits 290

LIGHT.

On the determination of the intensity of vibration of wavelets diverging from every point of a plane wave 46
Notes on some points in formal optics 122
Note on the measure of intensity in the wave theory of light 200

HEAT and ELECTRICITY.

Note on a passage in Fourier's Heat 25
On the uniform motion of heat in solid bodies, and its connection with the mathematical theory of electricity 71
On the linear motion of heat. Parts I. and II. 170, 206
On the attractions of conducting and non-conducting electrified bodies 275
On orthogonal isothermal surfaces 286
On the knight's move at chess. By *R. Moon* 233
Solutions of problems 95, 152, 292
